PROJECTS

Designing and Developing Websites for Small Businesses

- Working as a team, we have designed several websites for small companies around the country.
- We provide maintenance after the website goes live in case of any issues.
- Help the business owner with configuring hosting for the website.
- Developed using HTML, CSS, JavaScript and different libraries like jQuery.
- Some of the websites are www.connachtcleaning.ie, www.pdmwoodworking.ie and www.asilingfior.ie.

Second Year Project - Play Framework Website - Team Project

- As part of a team we designed and implemented a fully functioning E-Commerce website using Play Framework MVC.
- Database was functioning on eBeans and classes were created using Java.
- Documentation for the design, and tables for the database were created and planned using UML.
- Created test cases, which were used to find technical bugs.
- Dealt with specific bugs appropriately and learned skills to develop in an agile environment.
- Met with the co-ordinator once a week at the end of sprints to show the progress achieved.
- Used Git as Version Control.
- **Programming Languages & Tools Used:**
- Play MVC, Bootstrap, Scala, Java, HTML, CSS, Oracle VM, JavaScript.

EDUCATION
